

# Candidate Profile:

## MARGARET JONES

### BIO

**NAME:** Margaret Jones

**ROC:** Mountainside Community Cooperative, Camden, Maine

Board President of Mountainside since becoming a ROC in 2019, Margaret is also a member of Maine ROC Strong, ROC USA Policy and Advocacy Committee and part of the Maine Advocacy team. She also serves on the Manufactured Housing Board for the State of Maine and the Camden Town Budget Committee.

Retired from her corporate career, she has a sound background of getting the job done. While living in New Jersey, she served as project manager, productivity monitor, field support for automated maintenance and inventory systems, process improvement team and global maintenance repair system development team and implementation in the corporate equipment engineering division of a major global container shipping company. She also spent 10 years in field support and system sales and engineering in the air pollution control industry providing major air cleaning equipment for such clients as United States Steel.

Margaret has a strong commitment to work toward level playing fields for home ownership and responsible park management in manufactured housing communities. A native Mainer, she has returned to Camden where she is near to her lifelong connection to the water and traditional sailing.

Margaret Jones

### WHY I WOULD LIKE TO SERVE

At the Annual Meeting in Chicago last August, my eyes were opened to the scope of ROC Association and ROC USA and would consider it an honor to expend my energies in support of this amazing movement.

I feel it is important to continue and strengthen ROC Association's work building community and leveraging opportunities for currently owned resident parks and to further the outreach to new communities who wish to take command of their own destinies.

Great progress has been made, but there is still much to do leveling the playing fields enabling current ROCs to thrive and adding more communities to the security of park ownership.

Advances in federal, state, and local regulations, financing, insurance and public perception along with continued education of ROC members and support of Technical Advisors will take us to new heights.
